Suspected unexploded ordnance in Misburg-Nord
IMPORTANT INFORMATION FROM THE HANOVER FIRE BRIGADE
EVACUATION OF THE SECURITY ZONE: Sunday, 4 October 2026

Two sites suspected of containing unexploded ordnance were identified in Misburg-Nord during exploratory work. An evacuation of the public in the danger zone will take place on 4 October 2026 to conduct further investigations into the suspected sites and to potentially defuse any unexploded ordnance.

Surveys for unexploded ordnance are anticipated to continue in the area until early October as part of the planned Steinbruchsfeld-Ost neighbourhood development in the Misburg-Anderten district. Further work to prepare the building site, including the necessary sewer and pipework installation, will then be carried out. During these exploratory investigations, two sites were identified with a suspected presence of explosive ordnance from the Second World War. A security zone of 1,000 metres must therefore be established around the suspected sites in consultation with experts from the Lower Saxony Explosive Ordnance Disposal Service to conduct a more detailed investigation of the suspected sites and to take any necessary defusing measures. All the residents in the security zone are therefore requested to leave the affected area on **Sunday, 4 October 2026, from 9.00 am.**

**Persons affected by the evacuation are requested to leave the security zone
by 9.00 am on Sunday 4 October 2026!**
Please also let your neighbours know about the evacuation!

Everyone must leave the evacuation zone. A map extract showing the evacuation radius and a detailed list of the affected streets, is enclosed with this leaflet for public information purposes.

This order applies to roughly 17,500 residents in Hanover.

A support centre will be created for the local community at the Roderbruch Integrated Comprehensive School.

Further information and guidance

The necessary hazard elimination can only take place once all the security measures have been successfully implemented. The residents affected may not be able to return to their homes until the evening and should therefore take all the essential items with them, such as medication, baby food or special dietary requirements and suitable clothing. If necessary, let your relatives and friends know that you will be away from your home.
