Dear parents,
Dear guardians,

The fourth and thus the last school year at the primary school is the school year in which you deal intensively with the question, which secondary school may be the right choice for your child.

The choice of a school in the state capital Hanover is very diverse and differentiated. In all types of school, be it high school (Oberschule), junior high school (Realschule), comprehensive school (Gesamtschule) or gymnasium, the development of school profiles is being done continuously.

By offering special foreign language courses, inclusive orientation of the school, different profile classes, whole-day offerings and much more, the schools react to constantly changing social challenges and requirements for a modern and sustainable educational system.

In this brief brochure, we have put together everything you need to know about the school offerings of secondary schools in the state capital of Hanover, so that you don’t lose track of all the diversity.

You will notice that all available school types enable your child to achieve a qualified and connectable graduation certificate. Therefore, I would like to specifically encourage you to consider the choice of school type from grade 5 on, not as a „decision for life“, but as a decision for a type of school that is right for your child at the moment, hence when transitioning to the 5th grade.
Discuss with the primary school teacher of your child, which school type would be the most appropriate for your child. Because, you are not going to miss anything: Regardless of the type of the school, in which your child continues its education in grade 5, at the end of grade 9 or 10 all options will still be open for your child to graduate from a secondary school.

With warmest regards

Rita Maria Rzyski,
Councillor for personnel, education, youth and families
Information about the transition

At the end of the school year, the pupils move from the 4th class of primary school to a secondary school. In the 4th school year, the primary school offers the legal guardians at least two meetings to inform them about the individual learning progress of their child, and to advise them on the choice of the secondary school. Legal guardians make a decision about the school type for their children on their own responsibility. Since the schools have limited capacity, a lottery may decide the admission of the child. There is no entitlement to a place at a particular school. However, except for integrated comprehensive schools, a place in a certain type of school can be claimed. The transition to 5th grade does not happen automatically, but requires registration by the legal guardian.

For transition, the following secondary school types sponsored by the state capital of Hanover (LHH) are available:

- High school (Oberschule, OBS)
- Junior high school (Realschule, RS)
- School with special pedagogic profile (Schule mit besonderem pädagogischen Profil, SbpP)
- Gymnasium (GY)
- Integrated comprehensive school (integrierte Gesamtschule, IGS)

In addition, one can also chose schools that are sponsored by the private sector.

General sequence for foreign languages from the 5th grade on

5th vintage: English in all secondary schools.

6th vintage: second foreign language (elective in IGS), mandatory in gymnasia, in high schools and junior high schools, a second foreign language can be chosen within the framework of an elective course.

8th vintage: third foreign language (elective) only possible in gymnasia; can be elected in gymnasia that have a special focus on modern or classical languages.

11th vintage: the choice of a third language course, which would then be continued in vintages 12 and 13 is possible.

Supplying teachings, transport of pupils

Regarding supplying teachings and personal information of teachers as well as advice and help with legal questions (e.g. school change, special educational support, organization of teachings, disciplinary measures, contradictions against marks, certificates, grade retention and graduation), problems with school administrators and teaching staff, difficulties of children (reading and spelling weakness, dyscalculia, general learning difficulties), legal guardians, parents and pupils can first contact the schools directly, or
call on the state school authority (Landesschulbehörde) at Mailänder Strasse 2, 30539 Hanover (service hotline 106-6000).
The office of the province Hanover (Region Hannover), located at Hildesheimer Strasse 18, 30169 Hanover (phone: 616-22258), gives advice on transport of pupils and the federal education promotion act (BAföG application).

Registration dates for the 5th grade, school year 2020–21

**Integrated comprehensive schools**
Monday, 11th of May 2020, and Tuesday, 12th of May 2020, both days from 9 to 13 and 15 to 18 o'clock.

**High schools, schools with special pedagogic profile, junior high schools and gymnasia**
Monday, 15th of June 2020, and Tuesday, 16th of June 2020, both days from 9 to 13 and 15 to 18 o'clock.

**Responsible school**
All secondary schools, located in the urban area, can be freely chosen within the scope of available capacities; they have no fixed school districts. The entire urban area of Hanover is considered as a school district.

**Lottery**
Since the number of registrations at individual schools can be greater than their admission capacity, the number of students to be admitted is adjusted to the capacity of the respective school in a “distribution conference”. Therefore, it is recommended to specify some additional schools when registering at the desired school. The regulations of the “distribution conference” are met by the state school authority. This guarantees a place at the selected school type, but reserves the right to allocate to another school (than the desired one) of the same school type. According to the Lower Saxony schools act (NSchG), admission restrictions only apply to the lower secondary education (Sekundarbereich I) in comprehensive schools. There is therefore no place guarantee for this type of school.

**Important note for the transitioning pupils**
Leaving pupils, who have graduated an extended secondary education I at their school, can switch to the 11th year of a gymnasium or an IGS if their goal is to achieve a high school diploma (the so-called “Abitur”) at a general education school. There, they have to start again with the second compulsory foreign language if they have not previously taken part in a second foreign language class. The Abitur can be obtained at both school types, gymnasium and integrated comprehensive school, after a total of 13 school years.
General Information

Inclusive school
In Lower Saxony, the inclusive school was introduced at the beginning of the school year 2013/14. Learning together (inclusion) means that pupils with and without special pedagogic needs for support, visit a general education school together. The inclusive school gives the pupils barrier-free and equal access to the schools in Lower Saxony. Parents of pupils, whose need for special educational support has been determined, have a free choice for their child, whether it should go to general school or a school that offers special support (Förderschule). Each school offers at least five percent of its total places in the 5th vintage for inclusive schooling. The individual primary schools and the regional advice and support centre (RZI) of the state school authority of Lower Saxony provide advice with the phone number 0511 106 2352.

Language promotion
Providing comprehensive language promotion is a prerequisite for the successful integration of pupils with little or no knowledge of German. As a result of immigration in recent years, the proportion of pupils with a native language other than German has increased, and language promotion plays therefore a significant role in schools. Language promotion is part of continuous language education in every school subject, component of school programs as well as support concepts of schools. Supportive courses, supportive teachings or language promotion within the scope of special support concepts are being offered. Moreover, measures of language promotion prior to school enrolment are carried out by the day-care centres. Every single school is required to develop and implement suitable formats for pupils with language advancement needs.

Native language / multilingualism promotion
To achieve and strengthen bi- or multilingualism as a special qualification is the central aim of native language lessons in the primary school. For pupils of primary schools, an offer to learn or strengthen their native language has been established in many schools. The marks in native language lessons in the GS, like the achievements and marks in other subjects, are recorded on the certificate. In the school years 5 to 10, within the scope of an extended linguistic offer, native language lessons can also be set up, which can be taken part in by all pupils of the school. Provided that the native language is educated as a foreign language in secondary schools, the certificates will include the respective achievements as well. If the language class is offered in the form of working groups, the participation will be documented by including the comment “without performance assessment” in the
section notices (Bemerkungen) of the certificate. The aim is to be able to adequately promote multilingualism in schools in the future. If you are interested, ask the school administration about the existing multilingualism offerings in the school directly when registering your child.

**Educational consultation for newly immigrated school-aged children and adolescents**
The education bureau in the school department of the state capital of Hanover provides initial advice on school and educational issues in order to enable children and adolescents, who have just moved to Hanover, to have prompt access to the educational system of the state capital. The consultation takes place in close coordination with the Lower Saxony state school authority and the eligible schools in Hanover. The initial consultation for pupils provided by the bureau of education is aimed at children and adolescents aged between 5 and 17 years. The school-aged people themselves, parents, legal guardians and supporting multipliers are invited. School-aged migrants, refugees, newly immigrated persons with EU status and newly arrived school changers from other federal states or other municipalities in Lower Saxony receive consultations.

**Contact:** Claudia Dreyling und Martina Wagner, phone: 0511 / 168-31061
Appointments during office hours:
Tuesday, Wednesday, Thursday from 9 to 12 o'clock as well as Tuesday from 14:00 to 16:00 o'clock, or per e-mail: beratung-bildungsbuero@hannover-stadt.de

**Whole-day secondary school / organization and structure**
In whole-day schools, in addition to lessons according to the respective course plan, additional extra-curricular offers are given on at least three days. The so-called extra-curricular offers are derived from the content related and pedagogical mission of the school.

In the **free whole-day school**, these offers generally take place at the end of regular courses. Participation in the extra-curricular offers is voluntary. After being registered for this kind of courses, pupils are committed to attend them for the duration of a school semester or a school year.

At **partially-bound whole-day schools**, the pupils are committed to attend the school on at least two days per week for the whole school day. Generally, regular classes and extra-curricular offers alternate on these days (use of rhythm). On all other days, extra-curricular courses take place after the end of regular classes.

At **fully-bound whole-day schools**, the pupils are committed to attend the school on more than three whole days a week. Regular classes and extra-curricular offers alternate on these days (use of rhythm).
Locations of New Secondary Schools in Hannover, State Capital
THE NEW SECONDARY

The new secondary began for the school year 2015/16 in Hannover as a new type of school and as a school it encompasses secondary education / school years grade 5 to 10. In accordance with the decision of the school, lessons can be taught in one class consisting of students with different levels of performance in the subject. This type of school offers students with different performance potentials the chance to learn from and with each other in a manageable setting.

The compulsory foreign language at the new secondary school is English. In grades 6 to 10, this type of school has a range of elective compulsory subjects on offer which always encompasses four hours every week. From 6th grade onwards, the students take part

- either in a continuous elective compulsory course in the second foreign language for four hours per week, or
- in two elective compulsory courses in different subjects for two hours each per week which the school offers.

At this type of school, it is possible for students in grade 9 and 10 to establish an individual main focus in the areas of foreign languages, economics, engineering, or health and social matters which corresponds to their performance capacity and inclinations.

The new secondary offers an on-the-job practical focus with measures for job orientation and occupational training with cooperation partners such as the vocational training colleges, job advice centres at the employment agency, the chambers of commerce and industry, and in particular the companies that provide training and educational institutions.

The measures include, among others:
industrial placements for students, business orientation visits, lessons in collaboration with vocational education colleges, on-the-job practical projects and practice-oriented learning phases within special subject lessons.

From the 7th grade onwards, career-oriented measures are carried out, and from the 9th grade, career-oriented and occupational training measures all of which correspond to the main focus. These take place on at least 60 days, and for students who choose a profile offer, on at least 30 days.

At the end of 10th grade, the following final qualifications can be acquired:

- Upper secondary school qualification I – which entitles the student to attend the introductory phase of upper grammar school at a mainstream grammar school, or a comprehenseive school and also a vocational grammar school.
- Secondary school-leaving certificate I - Intermediate school-leaving certificate,
- Secondary school-leaving certificate I - Secondary school-leaving certificate

At the end of 9th grade, the secondary school-leaving certificate can be acquired.

The new secondary schools funded by the city are two-track schools which offer different all-day activities.
School organisation

- Two-track in all grades
- Semi-compulsory all-day school (two days compulsory, one day with voluntary sport activities on offer)
- Lunch and healthy breakfast
- School social education worker
- Inter-cultural education guide
- Intensive career orientation and preparation
- Lessons start at 8.15
- Work groups until 15.15
- Additional afternoon activities offered for grades 5 to 7 in the school kids' centre, Misburg

Inclusion

- Integration classes in grades 5 to 9
- Language learning classes

Foreign languages available

- English
- French from grade 6

Special range of activities

- Class teacher teams
- Tutors for the youngest pupils
- Team and social training in compulsory lessons from grade 5
- Easy learning group „Learning to learn“
- Domestic science and technology from grade 6
- Artistic-cultural education (elective compulsory courses) from grade 8
- Teaching subject “Fit for life”
- Prevention of violence and addiction
- Mediators (training course)
- Healthy nutrition
- Snacks and sandwich kiosk: schoolkids' company „Lozzis Snackbar“
- Work groups, e.g. water sport and games
- „No pupil without a swimming badge“
- Environmental education and ecology: energy-saving program
- Project weeks
- Class and project excursions
- Internet access for students
- School’s own homepage

Cooperation partners
- Trade guild of metalworkers and precision mechanics
- Sports and Athletics Club TSV Anderten
- Advertising association of Anderten Business Community (WAG)

Vocational orientation
- Career advice through the Employment Agency
- Mentoring for entry into the labour market
- Career choice from grade 7
- „Pestalozzi school“ career choice market
- Career information days
- Career choice pass
- Attending vocational training fairs
- Job application training
- Two internships of a fortnight each
- Individual career choice (grade 9) – interests, skills and motivation
- On the job training days in grade 9 (catering, interior decoration, landscape gardening, horticulture)

School organisation
• Two-track
• Semi-compulsory all-day school (Tuesday, Wednesday, Thursday)
• Breakfast club and snack bar (daily), lunch (Tues, Wed, Thurs)
• School social education worker
• Educator for vocational training
• Advisory teacher
• Inter-cultural education guide
• Pedagogical staff

Inclusion
• Barrier-free ground floor, disabled toilet
• Many years' experience in team with remedial teachers
• Key aspects of school are work and life practice
• Two language learning classes
• Additional support lessons for language acquisition
• Language advancement with pagagei.com; EDP with online portal (BNW)
• Art work group (artistic-aesthetic social work; advancement of artistic, social and linguistic competence)

Foreign languages available
• English from grade 5
• Spanish from grade 6

Special range of activities
• Flexible lesson structure, e.g. weekly task schedule
• Class teacher teams
• Classes with a motto: Nature and the environment, Health and exercise
• Social training
• Work groups: garden, hip hop, „Get to know your city“, football
• Music activities: playing the guitar, drums
• Dialogue is catching on: social participation in democracy
• Plan for life: my body, my responsibility, my future
• Outdoor pedagogics: team skills, personality development, creativity
- Hands-on day at cooperation school
- Parents' cafe with school social work, inter-cultural education guide, professional educator
- Girls' / boys' interval, games on loan, Slackline, table football

**Cooperation partners**
- Peter Ustinov Foundation
- Foundation Lower Saxon Metal Mint Cooperation Network (Stiftung NiedersachsenMetall Mint-Kooperationsnetzwerk)
- Education Office of Lower Saxon Business (Bildungswerk der Niedersächsischen Wirtschaft)
- Music College
- Dance school Amaro
- TUS Ricklingen
- Rural Adult Education (Ländliche Erwachsenenbildung (LEB))

**Vocational orientation**
- Professional educator
- Career advice of the Employment Agency (office hours)
- Company tours from grade 5
- Potential analysis and workshop phase – recognise and promote competencies
- Module for in-depth vocational orientation (BNW)
- Student/parents seminar for refugees (BNW)
- Network lessons for pupils with higher support needs at Vocational College 6
School organisation

- Number of tracks: two grade 5 classes in school year 2016/2017
- Semi-compulsory all-day school with mandatory afternoon program on 2 days for grades 5 to 8
- Cafeteria and warm lunch in the refectory
- Social education worker (vocational orientation and classic school social work)
- Main focuses: vocational orientation and computer science
- Advanced courses in English and mathematics from grade 6
- Advanced courses in German from grade 7
- Four hours of elective compulsory lessons in grades 6 to 8
- Four hours of profile lessons (French, economics, health and social matters, engineering) in grades 9 and 10
- Two hours of elective compulsory lessons and additional compulsory support hours in German and mathematics for lower performance students (grade 6 to 8)

Inclusion

- Barrier-free areas
- Accumulated experience of inclusive pedagogical work predominantly in the learning support area
- Language learning class and language advancement group

Foreign languages available

- Compulsory foreign language: English (grades 5 to 10)
- Elective compulsory foreign language: French (grades 6 to 8 as an elective compulsory course, in grades 9 and 10 as a focus subject)

Special range of activities

- Project lessons
- Class teacher teams
- Learning and method training, communication training
- One-to-one coaching about learning
- Homework support and remedial teaching
- Exam preparation courses (central written final exams)
- Prevention of violence and addiction
Social training
- Afternoon activities, including football, guitar, dancing, school band, among others
- Class and project excursions (e.g. group-forming seminar, riding)

Cooperation partners
- School partnership with Collège Pasteur/France
- Memorial sponsorship in cooperation with the work group “Citizens shape a memorial”
- Cooperation with the police force in Hannover concerning the „Cyber Licence“ (media driving licence)
- Cooperation with the Education Centre Hannover (analysis of potential)
- Cooperation with the Musikschule Hannover
- Cooperation with the Salem Youth Centre

Vocational orientation
- Two company internships in grade 9
- Career advice through the Employment Agency
- Analysis of potential and definition of competencies in grade 8
- Job application training, etiquette courses
- Seminar „Appearance and effect“ in grade 10
- Preparation and conducting examinations for European Computer Driving Licence and (Media) Cyber Licence
- Attending vocational training fairs
- Cooperation with vocational colleges and companies
- On the job practical training phases at companies
Locations of Secondary Modern Schools in Hannover, State Capital
THE SECONDARY MODERN

The secondary modern school encompasses grades 5 to 10. It conveys extended general education to its pupils and general vocational orientation, thus facilitating the individual decision-making process of their focus subjects.

At the secondary modern schools, the compulsory foreign language is English. A second foreign language (French, as a rule) is available as a four-hour elective compulsory course from grade 6. Students who do not choose the option of a second foreign language are taught in other elective compulsory courses at two hours apiece. Learning a second foreign language from grade 6 is not a pre-requisite for a possible transfer to the introductory phase of upper grammar school or to attend vocational grammar school. For a premature change to a grammar school, taking a second foreign language is a pre-requisite.

Besides the second foreign language, every secondary modern school offers grade 9 and 10 students at least one of the profiles economics, engineering or health and social matters in the elective compulsory area. The range of profile development depends on the organizational circumstances of the individual school, including personnel and facilities.

Occupational related schemes are carried out as hands-on days for a total of at least 30 schooldays, predominantly in grades 8 to 10. In grade 8 they serve as a preparation for the choice of focus subjects in grades 9 and 10, among other things. Vocational orientation is carried out in collaboration with cooperation partners such as vocational colleges, the Employment Agency, the chambers of commerce and industry, and in particular with the companies that provide training and educational institutions. Among others, the schemes include:

Career advice, student internships at companies, business orientation visits, lessons in cooperation with vocational colleges, on-the-job training projects and practice-oriented learning phases within specialized lessons.

At secondary modern schools that are at least two-track, there can be differentiation in the subjects mathematics and English or in one of the subjects from grade 9 onwards according to advanced courses.

At the end of grade 10, the following final qualifications can be acquired:

- Upper secondary school qualification I, which entitles attendance at the introductory phase of upper grammar school at a general education grammar school, or at a comprehensive school, and also at a vocational grammar school. At present, when attending an upper grammar school (grade 10 to 12), grade 10 has to be repeated. Through the return of the school leaving certificate (Abitur) after 13 school years, from the school year 2018/19 onwards, repeating grade 10 is not necessary.
- Secondary school-leaving certificate I - Intermediate school-leaving certificate
- Secondary school-leaving certificate I - Certificate of secondary education

The secondary modern schools run as city institutions are two- to three-track schools and are offered predominantly as half-day schools.
School organisation
- 5th and 6th grade: two-track
- Half-day school with voluntary range of activities in the shape of work groups and homework supervision
- Twice a week healthy breakfast in the first big break and daily sale of snacks at school kiosk

Inclusion
- Language support for language learning students in small groups parallel to lessons in normal classes

Foreign languages available
  - Compulsory foreign language: English from grade 5
  - Elective compulsory foreign language: French from grade 6
  - Elective compulsory foreign language: Spanish from grade 6
Special range of activities
- From grade 5, lessons with enhanced language activities (bilingual lessons) or enhanced scientific/artistic activities in the creative classes
- From grade 9 lessons in profile classes focusing on:
  - Notebook
  - Bilingual
  - Economics
  - Health and social matters
- Training in method competence at regularly organised method days
- Work group activities in the afternoon period
- Homework supervision during the afternoon

Vocational orientation
- Business orientation visits from grade 8
- Potential analysis and workshop days in 8th grades
- Work placements in grades 9 and 10
- Applicants’ training with companies
- Career advice through staff of the Employment Office and other institutions

School organisation
The Glocksee School Hannover is a one-track parents'-choice school for grades 1 to 10 with a special educational concept.
The children generally attend the school for ten years without changing schools and can sit the secondary, secondary modern or upper secondary modern leaving certificate I after 10th grade.
For grades 1 to 3 and 4 to 6 there are mixed-age learning groups respectively. In grades 7 to 10 a large part of the teaching is also organized in learning groups across the grades.
As a rule, there is no admission to grade 5. Admission after the first school year takes place only if a place in the school has become available. For interested parties, a waiting list is used.
- Semi-compulsory all-day school: Mondays, Tuesdays and Thursdays, 8 to 15.30, Wednesdays and Fridays 8 to 14.00
- Lunch for everyone on Mondays, Tuesdays and Thursdays, partly prepared by the parents
- Intensive parent (co-) work: monthly parents' meeting, cooperation in all committees, cooking

Inclusion
- Building only partly barrier-free
- Experience with support needs „Learning“, „Hearing“, „Social and emotional development“, „Mental development“.

Foreign languages available
- English and French

Special range of activities
„No racism at school – civic courage school “
- Self-organised learning
- Flexible lesson structure
- Social learning / social pedagogy with the school’s own concept
- Learning in projects
- Four project weeks in the school year
- Written and spoken performance assessment, marks only in grade 10
Main lesson block in German, mathematics, society, nature

Subject „Society“ (politics, geography, history)

Subject „Nature“ (biology, physics, chemistry)

Range of work groups („Bees“, „Circus, „School band“)

Class trips in every school year

Cooperation partners

“Eco-school Europe”

School exchange with a school in France

Member of the Union of independent alternative schools (BFAS)

Member of the association „A glance over the fence“

Maths researcher project

Vocational orientation

Students’ company in grade 7

Work placement in grades 8 and 9

Cooperation with Justus-von-Liebig School (Chemistry Lab) and Anna-Siemsen School (domestic science) in grade 10

Courses for vocational orientation for all students with the WorkShopSchool and the job laboratory
Locations of Grammar Schools in Hannover, State Capital
THE GRAMMAR SCHOOL (Gymnasium)

The grammar school encompasses the school grades 5 to 13. The grammar school gives its students a broad and deepened general education which makes it possible to achieve the general ability to study. It strengthens independent learning and guides towards working scientifically. According to their level of performance and inclinations, the grammar school facilitates the individual setting of priorities of its students. Lessons in the school grades 5 to 10 consist of compulsory lessons and elective lessons, or compulsory lessons, elective compulsory lessons and optional lessons, depending on the school’s decision.

At grammar schools, English is always the first compulsory foreign language (grades 5 to 10). Learning a second foreign language is compulsory from grade 6 onwards. Special subject-related lesson focuses can be offered in grade 8 to grade 10. Successfully completing grade 10 entitles the student to enter the introductory phase of the senior grades in grammar school.

Grammar school senior grades encompass the school grades 11 to 13. It is divided into a one-year introduction phase (grade 11) and a two-year qualification phase (12th and 13th grades). It ends with the school-leaving examination after thirteen school years.

In the introductory phase, lessons are given in one class, and in the qualification phase in courses. At the end of grade 11, the students choose a subjects’ profile with which they set their personal priorities (special subjects). The subject combination chosen is maintained until the final exam.

Students can choose between a language and a scientific focus. Corresponding to what the respective school offers, a social-scientific, a fine arts-artistic or athletic focus is possible. Irrelevant of this choice, three core subjects have to be taken continuously: German, a foreign language (advanced) and mathematics. As well as the special subjects and core subjects, further supplementary and optional subjects appear, as well as a seminar subject.

At the end of the secondary level I, school-leavers can acquire all possible school-leaving certificates of general education after grade 10. At the end of the qualification phase, the general university entrance qualification can be acquired through the final exam. If students leave (at the earliest at the end of the first year of the qualification phase) or do not pass the final exam, then the scholastic part of the advanced technical college certificate can be acquired insofar as the minimum conditions have been met.

At grammar school, the student work placement, fact-finding company tour and the appurtenant preparation and feedback session form the main focus of career-oriented measures. The student work placement encompasses ten to 15 school days in a block which are usually spent at a company or in another facility. The special features of the single comprehensive schools are shown on the following pages.

The grammar schools under city sponsorship are three to five-track schools and are offered as open all-day schools. Almost all grammar schools offer lunch for their students.
BISMARCKSCHULE
An der Bismarckschule 5 | 30173 Hannover
Telephone 168 | 43456
Fax 168 | 41371

- Cooperation with the City Library, Hannover
- Cooperation with TKH Hannover

Vocational orientation

- Modules on career choice and preparation for studies from grade 9
- Work placement in grade 10
- Vocational information day for qualification phase in grades 11 and 12
- Individual vocational advice in cooperation with the Employment Agency
Locations of Comprehensive Schools in Hannover, State Capital
THE COMPREHENSIVE SCHOOL

Depending on its location, the comprehensive school accommodates the school grades 5 to 13 or 5 to 10.

According to the Lower Saxony School Act (NSchG), there are only admission limits set for the secondary level I of comprehensive schools. Thus, for this type of school, there is no guarantee of a place.

At this type of school, students with different performance potential learn from and with one another. They are taught by teachers of all types of school according to a common syllabus. In order to acknowledge the individual learning progress, learning development reports or report cards are handed out. To encourage and challenge in specialized lessons, learning of methods and social learning throughout the whole teaching process characterise the pedagogical self-concept of the comprehensive school as a „School for all“ in secondary level I.

In the 5th and 6th grade, the entire body of lessons is given to the whole class. From grade 7, an outer subject performance differentiation is conducted in several subjects. In mathematics and English, there are advanced courses from school grade 7, in German from school grade 8 and in sciences from school grade 9.

Elective compulsory courses are available from the 7th school year and after the 9th school year according to the particular capacities of the school. From these, the students can form their own study focus according to their own respective inclinations. The compulsory foreign language at the comprehensive school is English. From the 6th school year, all interested students can learn a second foreign language.

All the certificates of general education can be acquired after the 10th school grade, as well as the Abitur at the five large schools with upper secondary level II: IGS Kronnsberg, IGS Linden, Leonore-Goldschmidt School-IGS Hannover-Mühlenberg, IGS Rorbruch and IGS Büssingweg with combined senior grades for IGS List and IGS Vahrenheide/Sahlkamp.

Vocational orientation takes place with cooperation partners such as the vocational colleges, the Employment Agency, the chambers of commerce and industry, and in particular the companies with trainee programs and educational institutions.

Among others, the measures include:

Career advice, student work placements, fact-finding company tours, lesson in cooperation with vocational colleges, work-related practical projects and practice-oriented learning phases within special subjects. They are based on the measures pertinent to the type of school of the other general education types of school.

The special features of the single comprehensive schools are illustrated on the following pages.

The comprehensive schools sponsored by the city are four- to eight-track schools and are offered as all-day schools which provide lunch in the schools’ own refectories.
School organisation
- Compulsory all-day school (from 8.15 until 15.40)
- Reliable on two to three afternoons
- Modern, roomy refectory
- Cafeteria
- Lunch break with warm meals
